Based on the information currently available to the Company, the Board believes that the main reasons attributable to the expected substantial increase in profit attributable to the owners of the Company are:

(ii) decrease in costs as a result of depreciation in Renminbi and Indonesian Rupiah.

The Company is still in the process of finalising the financial statements of the Group for the six months ended 30 September 2022. The information contained in this announcement is only a preliminary assessment made by the Board based on the management accounts of the Group and currently available information which have not been reviewed or audited by the Company's auditors.
