FINANCIAL HIGHLIGHTS (UNAUDITED)

The board of Directors (the “**Board**”) of the Company hereby announces the unaudited condensed consolidated first quarterly results of the Company and its subsidiaries (collectively referred to as the “**Group**”) for the three months ended 31 March 2023 (the “**Reporting Period**”), together with the unaudited comparative figures for the corresponding period in 2022.

The Group’s revenue decreased from approximately HK\$101,291,000 for the three months ended 31 March 2022 to approximately HK\$92,629,000 for the three months ended 31 March 2023, representing a decrease of approximately HK\$8,662,000 or 8.6%. Such decrease in revenue was mainly attributable to the combined effect of: (i) the reconciliation process of the variation orders and final accounts for the construction works at Tseung Kwan O-Lam Tin Tunnel and Organic Resources Recovery Centre; and (ii) the decrease in revenue from the Group’s private sector projects during the Reporting Period.

The Group’s gross profit decreased from approximately HK\$8,697,000 for the three months ended 31 March 2022 to approximately HK\$8,325,000 for the three months ended 31 March 2023, representing a decrease of approximately HK\$372,000 or 4.3%. The gross profit margin was approximately 9.0% for the three months ended 31 March 2023 (for the three months ended 31 March 2022: approximately 8.6%). Such decrease in gross profit was in line with the decrease in revenue as discussed above.

The Group’s profit and total comprehensive income attributable to the owners of the Company (“**Net Profit**”) for the three months ended 31 March 2023 was approximately HK\$1,203,000 (for the three months ended 31 March 2022: approximately HK\$3,396,000). Such decrease was mainly resulted from the increase in administrative expenses during the Reporting Period.

MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

The Group is an established subcontractor engaged in civil engineering works and operating solely in Hong Kong. Good Mind Engineering Limited, an indirect wholly-owned subsidiary of the Company, is a Group 2 Registered Specialist Trade Contractor with various trades qualification under the Construction Industry Council. The Group is principally engaged in the provision of underground construction services and mainly serves main contractors in public sector infrastructure projects. Public sector projects refer to the projects in which the main contractors are employed by the government of the Hong Kong Special Administrative Region (the “**Hong Kong Government**”), its statutory bodies or statutory corporations. The Group has also been involved in some private sector projects, which have covered all other types of engagements.

The Group provides underground construction services, in particular, tunnel construction services (including excavation, shotcreting, shutter design and fabrication, tunnel lining services, shafts, advanced and structural works) and utility construction (mainly the construction and refurbishment of underground public utility works such as road and drainage works) and others (mainly structural works related to tunnel construction and construction of service buildings and support structure for the public). The Group also provides programme design, costing and management for underground construction services. As a result, the Group works routinely with its key clients in pre-tenders for various underground construction projects.

Since 2014, the Group has been focusing on the development of a complete suite of tunnel construction services, which has laid a solid foundation for the Group’s growth and a strong advantage in securing contracts. The Group is constantly evaluating opportunities within the underground construction industry and seeking profitable areas in which it can develop, broaden or commence operation. Other than tunnel works, the Group has also participated in earthworks, bridge works and construction of service buildings during the Reporting Period. The Group considers that diversification is necessary under the current market condition, and continues to explore opportunity in other fields of the construction industry. As at the date of this report, the Group had submitted certain number of tenders to main contractors, the results of which were still pending.

During the three months ended 31 March 2023, the Group had secured a public construction project at Trunk Road T2 and five private sector projects with aggregate secured contract sums and confirmed variation orders of approximately HK\$8,055,000 and approximately HK\$26,605,000, respectively (the “**Newly Awarded Contracts**”).

During the three months ended 31 March 2023, the Group had been engaged in 30 public sector projects and five private sector projects. Please refer to the section headed “Financial Review” below for the analysis on the Group’s revenue. The total backlog of the Newly Awarded Contracts and contracts carried over from 2022 to be recognised as revenue after the Reporting Period was approximately HK\$947,964,000.

To maintain consistent quality services for all customers, the Group has established a formal quality management system which is certified to be in compliance with the requirements of ISO 9001:2015. The Group has in-house quality assurance requirements specifying, amongst other things, specific work procedures for performing various types of works, responsibilities of personnel of different levels, and accident reporting. Compliance with these quality assurance requirements is mandatory for all workers of the Group.

PRINCIPAL RISKS AND UNCERTAINTIES

The Group is reliant on the availability of public sector civil engineering projects in Hong Kong which by their nature are procured by a limited number of main contractors. Due to the fact that the civil engineering projects are non-recurring in nature, there is no guarantee that the Group will be able to secure new business from past or existing customers on a recurring basis. Accordingly, the number and scale of projects, and the amount of revenue from the public sector projects may vary from period to period, which may make it difficult for the Group to forecast the volume of future businesses and the amount of revenue.

The Group operates solely in Hong Kong and derived all its income in Hong Kong during the Reporting Period. Accordingly, the Group's business, financial results and prospects are affected by policies of the Hong Kong Government, political environment, economic and legal development in Hong Kong. The budgeting and funding approval process on public infrastructure and construction projects may be lengthened and the expected timetable of projects may be delayed. The Hong Kong Government's policy and public spending patterns on the civil engineering construction industry may also affect the availability of construction projects in Hong Kong.

The Group's historical results may not be indicative of its future performance, which may vary from period to period in response to a variety of factors beyond the Group's control, including general economic conditions, regulations pertaining to the underground construction industry in Hong Kong and the ability to secure new business in the future. Besides, adverse weather conditions, natural disasters, potential wars, terrorist attacks, riots, epidemics, pandemics (such as the coronavirus disease ("COVID-19")) and other disasters which are beyond the Group's control.

OUTLOOK OF TUNNEL AND CONSTRUCTION INDUSTRY IN HONG KONG

It is expected that there will be continuous demand for tunnel construction services in Hong Kong given that the construction works at Central Kowloon Route and the Three-runway System of the Hong Kong International Airport are gearing up. As a result, the Group will continue to focus on growing its tunnel construction services business and expects this to be its major growth driver and a long term and sustainable source of revenue. The growth in tunnel construction industry will mainly be supported by several major infrastructure projects including Central Kowloon Route, Sha Tin Cavern Tunnel, Diamond Hill Cavern Tunnel, Cha Kwo Ling Tunnel and the Three-runway System of the Hong Kong International Airport.

In respect of the contribution of the Central Kowloon Route, the Legislative Council of the Hong Kong Special Administrative Region (the “**Legco**”) had approved the funding of approximately HK\$42.3 billion on 20 October 2017. As at the date of this report, the Highways Department of the Hong Kong Government had awarded seven construction contracts of Central Kowloon Route to the main contractors with a total value of approximately HK\$28.9 billion, which included the construction works of (i) the shaft at Ho Man Tin; (ii) the tunnels at Kai Tak East and West; (iii) the tunnels at Yau Ma Tei East and West; (iv) the Central Tunnel; and (v) buildings, electrical and mechanical works.

The finance committee of Legco approved the funding of HK\$16.0 billion for the construction of Trunk Road T2 and Cha Kwo Ling Tunnel on 25 October 2019. This construction will connect the Central Kowloon Route and Tseung Kwan O-Lam Tin Tunnel to form Route 6 as an East-west Express Link between West Kowloon and Tseung Kwan O. The Civil Engineering and Development Department of the Hong Kong Government signed a works contract with a main contractor on 6 November 2019 for the design and construction of the trunk road with 3.1 kilometres in the form of tunnels, two ventilation buildings at the two ends of the trunk road, and associated works. The total cost of the contract is about HK\$10.9 billion. The whole project is scheduled for completion in 2026.

The Airport Authority Hong Kong has awarded several major construction contracts to the main contractors, which includes: (i) tunnels and related works for an automatic people mover and baggage handling system; (ii) expansion works at Terminal 2; (iii) North runway modification works; and (iv) Third Runway Concourse and Apron Works. Such construction works form major parts of the Three-runway System of the Hong Kong International Airport and consists of underground construction works.

The Water Service Department of the Hong Kong Government has awarded a construction contract for the relocation of Diamond Hill Fresh Water and Salt Water Service Reservoirs to caverns on 28 November 2022. This cavern tunnel is a drill and blast project, and the estimated works completion date is in December 2027.

The Group observes that these public infrastructure projects are coming on full stream in 2023. The Group is one of the selected few subcontractors experienced in tunnel construction in Hong Kong and is well prepared to capitalise on the opportunities from these public infrastructure projects.

Contingent liabilities

As at 31 March 2023, there were a number of labour claims lodged against the Group arising from the ordinary course of its civil engineering construction business. No specific claim amount has been specified in the applications of these claims. It is anticipated that the outflow of resources required in settling these claims, if any, was remote as these claims are usually covered by insurance maintained by relevant main contractors. Therefore, the ultimate liability under these claims would not have a material adverse impact on the financial position or performance of the Group and no provision for the contingent liabilities in respect of the litigations is necessary.

Foreign currency exposure

The Group's reporting currency is Hong Kong dollar. During the three months ended 31 March 2023, the Group's transactions were mainly denominated in Hong Kong dollars. The Group had no material exposure to foreign currency risk.

Event after the Reporting Period

There is no significant event subsequent to 31 March 2023 and up to the date of this report that would materially affect the Group's operating and financial performance.
