## BUSINESS AND FINANCIAL HIGHLIGHTS

### Business Highlights

- Dorzagliatin was launched in China in October 2022 with the trade name 华堂宁® (HuaTangNing). Hua Medicine has achieved total revenue of RMB87.9 million from the time of commercial launch at the end of October 2022 through the end of June 30, 2023. For the first half of 2023, Hua Medicine achieved revenues of RMB70.3 million, representing approximately a 299.6% increase in revenue compared with the second half of 2022. We work with our partner, Bayer Healthcare Company Limited (“Bayer”), in commercializing 华堂宁® in China.
- Upon 华堂宁® approval for two Type 2 diabetes (T2D) indications and successful commercial launch in China, Hua Medicine received RMB400 million non-refundable milestone payment from Bayer. With additional government funding, our total cash received from Bayer and government funding in the first half of 2023 is RMB402.6 million. Hua Medicine is expecting additional milestone payments from Bayer. Our cash balance as of June 30, 2023 was RMB881.3 million, representing an increase of approximately 79.6% from our cash balance of RMB490.6 million as of December 31, 2022.
- Hua Medicine has invested into dorzagliatin scale-up manufacturing capability at Changzhou SynTheAll (STA), Zhejiang Raybow and Shanghai Desano upon its successful commercial launch and during the initial out-of-pocket stage of commercialization. Hua Medicine has filed its National Reimbursement Drug List (NRDL) application for 华堂宁® and is preparing the pharmacoeconomic value discussion of 华堂宁® with regulatory agencies in the near-future.
- Hua Medicine continues to discover the therapeutic advantage of dorzagliatin in medical care. Through modulating the glucose sensor glucokinase (GK) function and repairing the impaired GLP-1 secretion in patients with diabetes and obesity, dorzagliatin is expected to secure new indication related to endogenous GLP-1 (Nature Comm March 2023). These results have encouraged physician to investigate the combination of dorzagliatin with GLP-1 receptor agonists for patients with poor control of post prandial glucose. Our team has also presented the positive effects of dorzagliatin in the prevention of diabetes and memory defect in GK rat at the June 2023 American Diabetes Association (ADA) conference in San Diego, USA.
- In June 2023, we published our results of SEED-DREAM study in the well-recognized medical journal of Diabetes, Obesity and Metabolism, in which we reported the dorzagliatin treatment effects during the SEED study that led to diabetes remission in the prospective 52-week clinical DREAM trial. Significant improvement of beta cell function and early phase insulin secretion were observed during the SEED trial, and contributed to an effective reduction of post prandial glucose in T2D patients and significant increase in TIR (Time in Range).
- Hua Medicine has advanced the development of 2<sup>nd</sup> generation of GKA in overseas markets. Our team is preparing an Investigational New Drug (IND) filing in the United States either by year end 2023 or early 2024. We are also continuing to develop new drug candidates of fix-dose-combination of dorzagliatin with metformin, sitagliptin and empagliflozin. In clinical studies we have found that combination of dorzagliatin with DPP-4 inhibitor or SGLT-2 inhibitor improved glycaemic control and beta cell function in patients with diabetes and obesity.

- Hua Medicine is investigating the clinical application of dorzagliatin in the prevention of diabetes. We have initiated the SENSITIZE II study at Chinese University of Hong Kong (CUHK) and are developing plans to study the opportunity of reversing impaired glucose tolerance (IGT) to normal glucose tolerance (NGT) in China. IGT is a primary cause of Type 2 diabetes in China, and there are approximately 500 million IGT patients worldwide. The main cause of IGT, especially those with impaired post prandial glucose tolerance, is the impairment of early phase insulin secretion in the pancreas and the defect of glucokinase expression in the liver. Mechanistically, dorzagliatin has the potential of reversing the condition of IGT to NGT, and thereby prevent diabetes.

## Financial Highlights

- Bank balances and cash position was approximately RMB881.3 million as of June 30, 2023.
  - Total revenue generated by the Company for the six months ended June 30, 2023 was approximately RMB70.3 million, reflecting the sales of approximately 212,000 packs of HuaTangNing (华堂宁®).
  - Total other income generated by the Company for the six months ended June 30, 2023 was approximately RMB38.6 million, of which approximately RMB21.7 million was attributable to the amortization of Bayer milestone income.
  - Total expenditures incurred by the Company for the six months ended June 30, 2023 was approximately RMB181.5 million, of which approximately RMB71.0 million was attributable to research and development expenses.
  - Research and development expenses decreased by approximately RMB1.3 million or approximately 1.8% to approximately RMB71.0 million for the six months ended June 30, 2023, compared with the six months ended June 30, 2022.
  - Loss before tax decreased by approximately RMB14.5 million or approximately 13.9% to approximately RMB90.1 million for the six months ended June 30, 2023, compared with the six months ended June 30, 2022.
  - Total comprehensive expense for the period decreased by approximately RMB14.0 million or approximately 13.4% to approximately RMB90.5 million for the six months ended June 30, 2023, compared with the six months ended June 30, 2022.

## MANAGEMENT DISCUSSION AND ANALYSIS

### Business overview

Dorzagliatin was launched in China in 2022 with the trade name 华堂宁® (HuaTangNing). Hua Medicine, working with our commercialization partner, Bayer Healthcare Company Limited, achieved total sales of RMB87.9 million from the time of commercial launch at the end of October 2022 through the end of June 30, 2023. For the first half of 2023, Hua Medicine achieved revenues of RMB70.3 million, representing approximately a 299.6% increase in revenue compared with sales achieved in the second half of 2022. The significant sales achieved after in the first launch in the very competitive hospital-oriented diabetes market is a result of the new government policy of on-line pharmacy sales regulation. Under this regulation, patients with online physician diagnosis and prescription can purchase the medicines for chronic diseases through the on-line drug store channels. This regulation is very helpful for patients, as it expands access to patients who can now secure 华堂宁® as a new medicine nationally before it enters into the National Reimbursement Drug List (NRDL) and enters hospitals nationwide.

Upon dorzagliatin approval by the China NMPA for two diabetes indications and its successful launch in China, Hua Medicine received a non-refundable milestone payment of RMB400 million from Bayer. With additional government funding, our total cash received from Bayer and government funding in the first half of 2023 is RMB402.6 million. Our cash balance as of June 30, 2023 was RMB881.3 million, representing an increase of approximately 79.6% from our cash balance of RMB490.6 million as of December 31, 2022. Hua Medicine is expecting to receive a certain milestone payment from Bayer relating to the development of HuaTangNing in the second half of 2023. The unique mechanism of action of dorzagliatin has demonstrated its benefit to improve beta cell function and repairs the impaired glucose homeostasis in T2D patients, through its target protein GK in the pancreatic alpha and beta cells, intestine L cells and liver hepatocytes.

Hua Medicine has worked with its manufacturing partners since the drug approval to manage market needs. We have secured adequate dorzagliatin supply for the 2023 calendar year and have initiated investment into dorzagliatin manufacturing capability at Changzhou SynTheAll (STA), Zhejiang Raybow and Shanghai Desano after the successful commercialization launch during the initial out-of-pocket stage. The total investment in 2023-2024 for commercial drug manufacture and capacity expansion is expected in the range of approximately RMB400 million.

Hua Medicine discovered the additional therapeutic advantages of dorzagliatin in medical care. Through its modulation of glucose sensor GK function and repairing the impaired GLP-1 secretion in patients with diabetes and obesity, dorzagliatin is expected to secure a new indication related to endogenous GLP-1 (Nature Comm March 2023). These results have encouraged physicians to investigate the combination of dorzagliatin with GLP-1 receptor agonists for patients with poorly controlled post prandial glucose. It further demonstrates dorzagliatin restores the impaired glucose homeostasis in T2D patients through its action on GK target located in the pancreas, intestine and liver – which is included in dorzagliatin drug label, NMPA 2022. This may offer a more effective way to achieve diabetes remission in obese diabetes patients through a combination of dorzagliatin with GLP-1 receptor agonist. We will engage the real-world study (RWS) to address additional unmet medical needs.

Our team has also reported effects of low dose dorzagliatin in the prevention of diabetes and memory loss in GK rat at the June 2023 American Diabetes Association conference (ADA) in San Diego, USA. We started with low dose dorzagliatin treatment when the rat is in normal glucose tolerance (NGT) stage. Dorzagliatin prevents the animal from developing diabetes and memory defect, while the vehicle controlled GK rats showed increase of fasting plasma glucose and memory deficiency. Reduction of Insulin Receptor A and B, glucose transporter GLUT3 and other important proteins that connects with neurological function in the brain in the vehicle group were prevented in the dorzagliatin treated group. We have filed patents in this area and will continue to expand the benefit of dorzagliatin in disease prevention.

In June 2023, we published our results of a prospective SEED-DREAM study in Chinese non-obese diabetes patients in the well-recognized journal, *Diabetes, Obesity and Metabolism*, in which we have reported a 65% remission probability during 52 weeks in subjects who have improved their TIR (Time-In-Range, a parameter that represents a better homeostasis control) after dorzagliatin treatment. We have further revealed the determinant factors for achieving diabetes remission after dorzagliatin treatment during the SEED study. These factors include a significant improvement of beta cell function and disposition index, reduction of post prandial glucose and significant increase of TIR during the SEED trial. Improvement of TIR is strongly correlated with reducing the risks of various diabetes complications, including heart attack, stroke and renal disease, as well as neurodegenerative disorders.

Hua Medicine has advanced the development of 2<sup>nd</sup> generation of GKA in overseas markets. It is our understanding that diabetes kidney disease (DKD) is an unmet clinical need in the United States and China. Our strategy is to develop a novel formulation to target these patients who need to better control their TIR and to reduce the progression of kidney dysfunction. Our team is preparing the IND filing in the United States either by year end 2023 or early 2024. We are also continuing to develop new drug candidates of fixed-dose-combination of dorzagliatin with metformin, sitagliptin and empagliflozin as a part of dorzagliatin life cycle management. In clinical studies, we have found that combination of dorzagliatin with DPP-4 inhibitor or SGLT-2 inhibitor improved glycaemic control and beta cell function in patients with diabetes and obesity.

Hua Medicine is investigating the potential of dorzagliatin in diabetes prevention in a clinical study. After initiation of the SENSITIZE II study at CUHK, we are developing clinical study plans to reverse IGT to NGT in China. IGT is a primary cause of Type 2 diabetes in China, and there are approximately 500 million IGT patients worldwide. The main cause of IGT, especially those with impaired post prandial glucose tolerance, is the impairment of early phase insulin secretion in the pancreas and the defect of glucokinase expression in the liver. Mechanistically, dorzagliatin has the potential of reversing the condition of IGT to NGT, and thereby prevent diabetes.

We are at the forefront of diabetes prevention and remission. Our effort in understanding of the connection between glucose homeostasis and neurological defects has led to the discovery of dorzagliatin-based therapies to prevent diabetes and memory defects in GK rats (2023 ADA presentation). Reports showed that with increased age, or disease conditions like IGT, MODY2 and Type 2 diabetes, GK expression and function were significantly reduced. Dorzagliatin can restore the GK function and expression in the disease conditions, including MODY-2 (SENSITIZE 1 study, Diabetes 2023) and Type 2 diabetes (J Diabetes Res 2017). We reasoned that neurodegenerative diseases are a part of diabetes complications and our recent results suggested that the neuroprotective effect of dorzagliatin is an outcome of a sustained glucose homeostasis management effect in GK rats.

Except for the fixed dose combination programs, which we would endeavour to secure external funding prior to advancement to NDA approval and commercialization, the other pipeline programs are in relatively early-stage research and development, and the expenses associated with such early-stage studies are expected to be less than later stage, large scale clinical trials needed for approval. We believe all our programs have global development potential.

**Cautionary Statement:** We may not be able to ultimately develop and market our dorzagliatin successfully.

### Business outlook

We will continue our responsibility as market authorization holder (MAH) of dorzagliatin to commercialize dorzagliatin in China with our partner, Bayer, to expand market share in diabetes care, especially among Type 2 diabetes patients with uncontrolled post prandial glucose (PPG) who will benefit from the improvement of beta cell function and time in range (TIR). We will continue to invest into our dorzagliatin manufacturing capability and the tier-1 distributor network to drive a three-pronged approach in China commercialization: hospital, pharmacy, and on-line drug stores. We are seeking entry into the National Reimbursement Drug List (NRDL), to facilitate the entry into hospital and increase accessibility by physicians in order to demonstrate dorzagliatin as a potential cornerstone treatment for Type 2 diabetes as monotherapy or in combination with other approved antidiabetic drugs. Additional benefits of dorzagliatin in disease prevention will be further explored in endocrinology and neurodegeneration. We are also advancing development of our second generation glucokinase activator for potential future international expansion including DKD and diseases associated with impaired glucose homeostasis. Currently, we are actively looking for business partners to advance our R&D programs and commercialization to help more patients globally.

### Important events after the Reporting Period

On August 17, 2023, the Group and Bayer have confirmed the achievement of a certain milestone relating to the development of HuaTangNing (dorzagliatin tablets, HMS5552). Pursuant to the terms of the commercialization agreement entered into between the Group and Bayer, the Group has achieved the milestone event and the Group is entitled to receive a milestone payment of RMB800 million from Bayer. Further details are set out in the announcement of the Company dated August 18, 2023.

Save as disclosed above, there are no important events that have occurred since June 30, 2023 and up to the date of this report.

## Financial review

### Revenue

Our revenue was generated from the sale of our core product – HuaTangNing (华堂宁®). The collective results of our clinical trials indicate HuaTangNing (华堂宁®) has a safe, tolerable and benign profile, is effective at restoring regulation of blood glucose homeostasis through improvement in  $\beta$ -cell function and reduction in insulin resistance, and has led to diabetes remission in select populations of T2D patients.

For the six months ended June 30, 2023, approximately 212,000 packs of HuaTangNing (华堂宁®) were sold, generating sales of approximately RMB70.3 million. From first commercial launch through June 30, 2023, approximately 265,000 packs of HuaTangNing (华堂宁®) were sold, generating sales of approximately RMB87.9 million.

### Gross profit

For the six months ended June 30, 2023, we recorded a gross profit of approximately RMB44.0 million and a gross margin of 62.6%. Our gross margin increased by 18.9% as compared to 43.7% for the year ended December 31, 2022, which was primarily due to the sufficient supply and increased sales volume, leading to the decreased unit production expense and unit fixed cost. As our commercialization scale increases, the gross margin is expected to continually increase to a more normalised rate.

### Other income

Our other income consisted primarily of Bayer milestone income, government grants and bank interest income. Our other income increased by RMB17.2 million to RMB38.6 million for the six months ended June 30, 2023 from RMB21.4 million for the six months ended June 30, 2022, which was mainly attributable to an increase of RMB21.7 million in Bayer milestone income and RMB6.2 million in bank interest income from short-term deposits for the six months ended June 30, 2023, adjusted for a decrease of RMB10.7 million in government grants.

### Other gains and losses

Our other gains and losses consisted primarily of gains due to fluctuations in the exchange rates between the Renminbi and the U.S. dollar and between Renminbi and the HK dollar. Our other gains and losses decreased by RMB7.9 million and were mainly attributable to foreign exchange gains in connection with bank balances and cash denominated in U.S. dollar and HK dollar and the small appreciation of the U.S. dollar and HK dollar against the Renminbi for the six months ended June 30, 2023, compared to the large appreciation of the U.S. dollar and HK dollar against the Renminbi for the six months ended June 30, 2022.

Our business mainly operates in the PRC, and most of our transactions are settled in Renminbi. Since inception, we have financed our business principally through equity financings, with related proceeds denominated in U.S. dollar, HK dollar and Renminbi. We converted a portion of those U.S. dollar proceeds to Renminbi and HK dollar proceeds to U.S. dollar immediately, with the remaining amounts reserved for additional conversions to Renminbi as needed. Translation for financial statement presentation purposes of our assets and liabilities exposes us to currency-related gains or losses and the actual conversion of our U.S. dollar and HK dollar denominated cash balances will also expose us to currency exchange risk. We have not engaged in any foreign exchange hedging related activity.

### Administrative expenses

Our administrative expenses consisted primarily of employee compensation and related costs. Our administrative expenses decreased by RMB14.5 million to RMB54.0 million for the six months ended June 30, 2023 from RMB68.5 million for the six months ended June 30, 2022, which was mainly attributable to i) a decrease of RMB11.2 million in labor cost, which was primarily attributable to the labor cost reallocation of marketing department to selling expense from first commercial sales and the decrease of share-based payment under the accelerated amortization method; ii) a decrease of RMB5.3 million in consultant fee, which was mainly due to the reallocation of marketing related consulting to selling expense and less NDA application related consulting was conducted during the six months ended June 30, 2023, since we got our NDA approval in the fourth quarter of year 2022; and iii) an adjustment for the increase of RMB1.1 million in recruitment expense due to our recruitment strategy.

### Finance cost

Our finance cost consisted of expenses associated with the interest on lease liabilities and bank loan. Our finance cost was RMB3.5 million for the six months ended June 30, 2023 as compared to RMB1.8 million for the six months ended June 30, 2022, which was mainly attributable to the newly raised bank loan at the late of year 2022 and the first half of year 2023.

### Selling expenses

Our selling expenses consisted primarily of expenses related to selling and marketing activities. Our selling expenses was RMB52.9 million for the six months ended June 30, 2023, which consisted primarily of RMB15.0 million of employee compensation, RMB29.0 million of promotion expense and RMB8.9 million of meeting expense, consulting expense, logistics expense and other related expenses.

### Research and development expenses

The following table sets forth the components of our research and development expenses for the period indicated.

	Six months ended June 30,			
	2023		2022	
	RMB'000	%	RMB'000	%
Dorzagliatin Clinical Trials	1,900	2.7%	2,948	4.1%
Dorzagliatin Non-clinical Studies	4,032	5.7%	789	1.1%
Chemical, Manufacturing and Control	11,900	16.8%	9,015	12.5%
Labor Cost	34,926	49.2%	47,279	65.4%
Dorzagliatin Licensing and Patent Fee	2,300	3.2%	774	1.1%
Others	15,940	22.4%	11,481	15.8%
Total	<u>70,998</u>	<u>100%</u>	<u>72,286</u>	<u>100.0%</u>

Research and development expenses decreased by RMB1.3 million to RMB71.0 million for the six months ended June 30, 2023 from RMB72.3 million for the six months ended June 30, 2022. The decrease in research and development expenses mainly included:

- an increase of RMB3.2 million for dorzagliatin non-clinical studies from RMB0.8 million for the six months ended June 30, 2022 to RMB4.0 million for the six months ended June 30, 2023, which was primarily attributable to the pre-clinical studies of second generation glucokinase activator conducted in the United States in the first half of 2023 and no such studies were conducted in the first half of 2022;
- an increase of RMB2.9 million in chemical, manufacturing, and control expenses from RMB9.0 million for the six months ended June 30, 2022 to RMB11.9 million for the six months ended June 30, 2023. We focused on the scale up and process development for existing production line and process validation for intermediate product in the first half of 2023. In the first half of 2022, we focused on the process validation, drug substance and production for clinical trial which was required by the NMPA;
- a decrease of RMB12.4 million in labor cost from RMB47.3 million for the six months ended June 30, 2022 to RMB34.9 million for the six months ended June 30, 2023, which was primarily attributable to the labor cost reallocation of manufacturing department to cost from first commercial sales and the decrease of share-based payment under the accelerated amortization method; and
- an increase of RMB4.4 million in other expenses from RMB11.5 million for the six months ended June 30, 2022 to RMB15.9 million for the six months ended June 30, 2023, which was primarily attributable to increased travelling expense, meeting expense and utility expense due to the impact of COVID-19 in the first half of year 2022 and recovered in the first half of year 2023.

#### Income tax expense

We recognized no income tax expenses for the six months ended June 30, 2023 and the six months ended June 30, 2022.

#### Liquidity and capital resources

Since our inception, we have incurred net losses and positive cash flows from operations. Our primary use of cash is to fund manufacturing expenses and research and development expenses. Our operating activities generated RMB258.8 million for the six months ended June 30, 2023. As of June 30, 2023, we had cash and cash equivalents of RMB881.3 million.

As of June 30, 2023, there were no significant investments held by the Company (including any investment in an investee company with a value of 5% or more of the Company's total assets as of June 30, 2023), nor were there any material acquisitions or disposals of subsidiaries, associates or joint ventures during the six months ended June 30, 2023.

### Cash operating cost

The following table sets out the components of our cash operating cost for the periods indicated:

	<b>Six months ended June 30,</b>	
	<b>2023</b>	<b>2022</b>
	<b>RMB'000</b>	<b>RMB'000</b>
Research and development costs	72,213	70,599
Manufacturing costs	61,568	-
Administrative costs		
– Workforce employment	35,810	38,276
– Others	32,108	33,448
Selling costs	18,725	-
	<u>220,424</u>	<u>142,323</u>

### Cash flows

The following table provides information regarding our cash flows for the six months ended June 30, 2023 and 2022:

	<b>Six months ended June 30,</b>	
	<b>2023</b>	<b>2022</b>
	<b>RMB'000</b>	<b>RMB'000</b>
Net cash from (used in) operating activities	258,769	(116,659)
Net cash from investing activities	691	17,024
Net cash from (used in) financing activities	122,736	(4,293)
Effect of exchange rate changes	8,461	14,997
	<u>390,657</u>	<u>(88,931)</u>

### Net cash from (used in) operating activities

The primary use of our cash was to fund our research and development activities, manufacturing activities, regulatory and other clinical trial costs, and related supporting administration. Our prepayments and other current assets, accounts payable and other payables balances were affected by the timing of vendor invoicing and payments.

During the six months ended June 30, 2023, our operating activities generated RMB258.8 million of cash, which resulted principally from our loss before tax of RMB90.1 million, adjusted for non-cash charges and non-operating cash income of RMB12.0 million, and by cash generated from our operating assets and liabilities of RMB360.9 million. Our net non-cash charges during the six months ended June 30, 2023 primarily consisted of share-based payment expense, depreciation of equipment, right-of-use assets and amortization for intangible assets.

During the six months ended June 30, 2022, our operating activities used RMB116.7 million of cash, which resulted principally from our loss before tax of RMB104.6 million, adjusted for non-cash charges and non-operating cash gains of RMB1.6 million, and by cash used in our operating assets and liabilities of RMB10.5 million. Our net non-cash charges during the six months ended June 30, 2022 primarily consisted of share-based payment expense, depreciation of equipment, right-of-use assets and amortization for intangible assets.

### Net cash from investing activities

Net cash from investing activities was RMB0.7 million for the six months ended June 30, 2023, which resulted primarily from the interest received from bank for short-term deposit, adjusted for the purchase of plant and equipment and intangible assets. Net cash from investing activities was RMB17.0 million for the six months ended June 30, 2022, which resulted primarily from the government grant received to subsidize the Group's leasehold improvement, furniture, fixture and equipment purchased in the prior years and the interest received from bank for short-term deposit, adjusted for the purchase of plant and equipment and intangible assets.

### Net cash from (used in) financing activities

Net cash from financing activities was RMB122.7 million for the six months ended June 30, 2023, which proceeds from short-term and long-term bank loan and exercise of share options, offset by payments relating to lease liabilities. Net cash used in financing activities was RMB4.3 million for the six months ended June 30, 2022, which resulted from repayments of lease liabilities, adjusted for proceeds from exercise of share options.

### Financial position

Our net current assets decreased from RMB751.9 million as of December 31, 2022 to RMB717.5 million as of June 30, 2023. Current assets increased from RMB940.3 million as of December 31, 2022 to RMB974.0 million as of June 30, 2023, primarily due to RMB70.3 million of sales revenue was recognized for the six months ended June 30, 2023.

## Indebtedness

As of June 30, 2023, our lease liabilities and borrowings amounted to RMB54.5 million and RMB162.7 million. The following table sets forth our lease liabilities and borrowings as of the dates indicated:

	<b>As of June 30, 2023 RMB'000</b>	<b>As of December 31, 2022 RMB'000</b>
Current portion	128,717	55,413
Non-current portion	88,515	42,169
Total	<u>217,232</u>	<u>97,582</u>

## Qualitative and quantitative disclosures about market risk

We are exposed to a variety of market risks, including currency risk, interest rate risk, credit risk and liquidity risk, details of which are set out below. We manage and monitor these exposures to ensure appropriate measures are implemented in a timely and effective manner. We currently do not hedge or consider it necessary to hedge any of these risks.

### Currency risk

Our business mainly operates in the PRC with most of our transactions settled in Renminbi, and our financial statements are presented in Renminbi. Renminbi is not a freely convertible currency. The State Administration of Foreign Exchange, under the authority of the People's Bank of China, controls the conversion of Renminbi into foreign currencies. The value of Renminbi is subject to changes in central government policies and to international economic and political developments affecting supply and demand in the China Foreign Exchange Trade System market. We do not believe that we currently have any significant direct foreign exchange risk and have not used any derivative financial instruments to hedge our exposure to such risk.

Since our inception, we have raised funds through various rounds of offshore financings and received proceeds of such financings in U.S. dollars, HK dollars and Renminbi. We converted a portion of those funds to Renminbi immediately and placed the remaining amount in time deposits. We converted additional amounts to Renminbi as needed. The value of the Renminbi against the U.S. dollars and other currencies may fluctuate and is affected by, among other things, changes in China's political and economic conditions. To the extent that we need to convert U.S. dollars or other currencies we have received in previous financings into Renminbi for our operations, or if any of our arrangements with other parties are denominated in U.S. dollars and need to be converted into Renminbi, appreciation of the Renminbi against the U.S. dollars or other currencies would have an adverse effect on the Renminbi amount we receive from the conversion. Conversely, if we decide to convert Renminbi into U.S. dollars or other currencies for business purposes, appreciation of the U.S. or HK dollars against the Renminbi would have a negative effect on the U.S. dollars or other currencies amounts available to us. We have conducted a sensitivity analysis to determine our exposure to changes in foreign currency rate.

The following table details our sensitivity to a 5% increase and decrease in the Renminbi against the U.S. dollar and the HK dollar, the foreign currencies to which we may have material exposure. No sensitivity analysis has been disclosed for the Taiwan dollar denominated assets as the impact on profit is immaterial. 5% represents management's assessment of the reasonably possible changes in foreign exchange rate. The sensitivity analysis uses outstanding foreign currency denominated monetary items as a base and adjusts their translation as of June 30, 2023 for a 5% change in foreign currency rate. A negative number below indicates an increase in loss where Renminbi strengthens 5% against the U.S. dollar and the HK dollar. For a 5% weakening of the Renminbi against the U.S. dollar and the HK dollar, there would be an equal and opposite impact on gain for the period.

<b>Impact on profit or loss</b>		
US\$	(9,342)	(9,893)
HK\$	(2,499)	(2,250)

### Interest rate risk

The Group is primarily exposed to fair value interest rate risk in relation to fixed-rate short-term bank deposits. The Group currently does not have an interest rate hedging policy to mitigate interest rate risk. Nevertheless, the management monitors interest rate exposure and will consider hedging significant interest rate risk should the need arise.

The Group is also exposed to cash flow interest rate risk in relation to variable-rate bank balances. The Group's cash flow interest rate risk is mainly concentrated on the fluctuation of interest rates on bank balances. The Directors consider that the exposure of cash flow interest rate risk arising from variable-rate bank balances is insignificant, therefore no sensitivity analysis on such risk has been prepared.

### Liquidity risk

As of June 30, 2023 and December 31, 2022, we recorded net current assets of RMB717.5 million and RMB751.9 million, respectively. In the management of the liquidity risk, we monitor and maintain a level of cash and cash equivalents deemed adequate by our management to finance our operations and mitigate the effects of fluctuations in cash flows.

### Key financial ratios

The following table sets forth our key financial ratios as of the dates indicated:

	<b>As of June 30, 2023</b>	<b>As of December 31, 2022</b>
Current ratio <sup>(1)</sup>	3.8	5.0
Quick ratio <sup>(2)</sup>	3.7	5.0
Gearing ratio <sup>(3)</sup>	104.2%	34.9%

(1) Current ratio represents current assets divided by current liabilities as of the same date.

(2) Quick ratio represents current assets less inventories divided by current liabilities as of the same date.

(3) Gearing ratio represents liability divided by equity as of the same date. Liability is defined as short term loan, long term loan and lease liabilities (excluding trade and other payables, deferred income and contract liability). Equity includes all capital and reserves of the Group.

The current ratio as of June 30, 2023 decreased by 1.2 compared with that as of December 31, 2022, quick ratio as of June 30, 2023 decreased by 1.3 compared with that as of December 31, 2022, which was mainly due to the increase of short-term loan. The gearing ratio as of June 30, 2023 increased by 69.3% compared with that as of December 31, 2022, which was mainly due to the increase of short term and long term loan caused by our financing strategy.

### Charge of the Group's assets

As of June 30, 2023, RMB7.8 million of the Group's bank deposits were charged by the bank for the performance guarantees to the Management Committee of Lingang New Area, Shanghai Pilot Free Trade Zone, China to secure commencement and completion of the factory construction and launch of production.

Deposits amounting to RMB4,696,000 (unaudited) (December 31, 2022: RMB4,696,000 (audited)) carrying a fixed interest rate of 1.50% have been pledged to secure commencement of the factory construction. Deposits amounting to RMB1,565,000 (unaudited) (December 31, 2022: RMB1,565,000 (audited)) carrying a fixed interest rate of 2.75% have been pledged to secure completion of the factory construction. These deposits will be released within 10 working days upon the completion of the factory construction, if such completion is before May 13, 2024. The remaining deposits amounting to RMB1,565,000 (unaudited) (December 31, 2022: RMB1,565,000 (audited)) carrying a fixed interest rate of 2.75% have been pledged to secure production of the factory. These deposits will be released within 10 working days upon the launch of production, if such launch is before November 12, 2024.

### Capital commitments

The following table sets forth our capital commitments as of the dates indicated:

	As of June 30, 2023 RMB'000	As of December 31, 2022 RMB'000
Capital expenditure in respect of the acquisition of construction contracted for but not provided in the consolidated financial statements	24	1,107

### Future plans for material investments or capital assets

As of June 30, 2023, we planned to continue to invest in Shanghai Huasheng Inc, which was established at Shanghai Lingang Special Area for ensuring adequate dorzagliatin commercial supply and the source of funding is expected to come from internal resources and/or external borrowings, as considered appropriate by the management of the Company.

### Contingent liabilities

Save as disclosed in this report, the Group had no material contingent liabilities as of June 30, 2023 (as of June 30, 2022: Nil).

### Disclosure under Rules 13.20 to 13.22 of the Listing Rules

The Company does not have any continuing disclosure obligations under Rules 13.20, 13.21 and 13.22 of the Listing Rules.

### Employees and remuneration policy

As of June 30, 2023, we had 170 employees, as compared to a total of 144 employees as of December 31, 2022. The following table shows a breakdown of our employees by function as of June 30, 2023:

	Number of employees	Approximate percentage
Research and development	61	36%
General and administration	54	32%
Commercial and marketing	26	15%
Manufacturing	19	11%
Management	10	6%
Total	<u>170</u>	<u>100%</u>

The majority of the employees are employed in mainland China. For the six months ended June 30, 2023, the staff costs (including Directors' emoluments but excluding any contributions to pension scheme) were approximately RMB81.9 million as compared to RMB80.4 million for the six months ended June 30, 2022.

The Group will continue to offer competitive remuneration packages, discretionary share options and bonuses to staff. The Group's employee remuneration policy is determined by taking into account factors such as remuneration in respect of the overall remuneration standard in the industry and employee's performance. The management reviews the Group's employee remuneration policy and agreements on a regular basis. Moreover, the social insurance contributions are made by the Group for its PRC employees in accordance with the relevant PRC regulations.

The Group also provides continuous learning and training programs to its employees to enhance their skills and knowledge, so as to maintain their competitiveness and improve their working efficiency. The Group did not experience any major difficulties in recruitment, nor did it experience any material loss in manpower or any material labor dispute during the six months ended June 30, 2023.

The Company has also adopted a Pre-IPO Share Incentive Scheme and a Post-IPO Share Option Scheme. Please refer to the section headed "Statutory and General Information – D. Share Incentive Schemes" in Appendix IV to the Prospectus and the annual and interim reports of the Company for further details.

## Share Schemes

The Company currently has two existing share schemes, namely the Pre-IPO Share Incentive Plan and the Post-IPO Share Option Scheme. The Pre-IPO Share Incentive Plan and the Post-IPO Share Option Scheme were adopted before the effective date of the new Chapter 17 of the Listing Rules. The Company will comply with the new Chapter 17 to the extent required by the transitional arrangements for existing share schemes.

11,400,000 Shares, representing approximately 1.1% of the weighted average number of Shares for the Reporting Period, may be issued in respect of options and awards granted during the Reporting Period to eligible participants pursuant to all of the share schemes.

### 1. Pre-IPO Share Incentive Scheme

The Company has established an employee trust to administer the scheme and a total of 117,000,000 Shares, representing all the Shares underlying the options and awards granted under the Pre-IPO Share Incentive Scheme, had been issued to HLYY Limited, the nominee under the trust, to hold the Shares to satisfy the options and awards granted upon exercise/vesting.

Details of the material terms of the Pre-IPO Share Incentive Scheme are set out in the annual report of the Company for the year ended December 31, 2022 and details of the movements in the outstanding share options granted under the Pre-IPO Share Incentive Scheme (to be satisfied by existing Shares) during the Reporting Period will be set out in the annual report of the Company for the year ending December 31, 2023.

## REPORT ON REVIEW OF CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

### TO THE BOARD OF DIRECTORS OF HUA MEDICINE

(Incorporated in the Cayman Islands with limited liability)

#### Introduction

We have reviewed the condensed consolidated financial statements of Hua Medicine (the “Company”) and its subsidiaries (collectively referred to as the “Group”) set out on pages 23 to 46, which comprise the condensed consolidated statement of financial position at June 30, 2023 and the related condensed consolidated statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the six months then ended, and certain explanatory notes. The Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited require the preparation of a report on interim financial information to be in compliance with the relevant provisions thereof and International Accounting Standard 34 “Interim Financial Reporting” (“IAS 34”) issued by the International Accounting Standards Board. The directors of the Company are responsible for the preparation and presentation of these condensed consolidated financial statements in accordance with IAS 34. Our responsibility is to express a conclusion on these condensed consolidated financial statements based on our review, and to report our conclusion solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

#### Scope of Review

We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410 “Review of Interim Financial Information Performed by the Independent Auditor of the Entity” (“HKSRE 2410”) issued by the Hong Kong Institute of Certified Public Accountants. A review of these condensed consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

#### Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the condensed consolidated financial statements are not prepared, in all material respects, in accordance with IAS 34.

#### 1.2 Basis of preparation

The condensed consolidated financial statements have been prepared in accordance with International Accounting Standard 34 *Interim Financial Reporting* issued by the International Accounting Standards Board as well as with the applicable disclosure requirements of Appendix 16 to the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited.

The functional currency of the Company is Renminbi (“RMB”), which is the same as the presentation currency of the condensed consolidated financial statements.

### 2. PRINCIPAL ACCOUNTING POLICIES

The condensed consolidated financial statements have been prepared on the historical cost basis.

Other than changes in accounting policies resulting from application of amendments to International Financial Reporting Standards (“IFRSs”), the accounting policies and methods of computation used in the condensed consolidated financial statements for the six months ended June 30, 2023 are the same as those presented in the Group’s annual financial statements for the year ended December 31, 2022.

## 2. PRINCIPAL ACCOUNTING POLICIES (Continued)

### Application of amendments to IFRSs

In the current interim period, the Group has applied the following amendments to IFRSs issued by the International Accounting Standard Board (the "IASB"), for the first time, which are mandatorily effective for the annual period beginning on or after January 1, 2023 for the preparation of the Group's condensed consolidated financial statements:

IFRS 17 (including the June 2020 and December 2021 Amendments to IFRS 17)	Insurance Contracts
Amendments to IAS 8	Definition of Accounting Estimates
Amendments to IAS 12	Deferred Tax related to Assets and Liabilities arising from a Single Transaction
Amendments to IAS 12	International Tax Reform-Pillar Two model Rules

The application of these amendments to IFRSs in the current interim period has had no material impact on the Group's financial positions and performance for the current and prior periods and/or on the disclosures set out in these condensed consolidated financial statements.

## 12. LOSS PER SHARE

The calculation of the basic and diluted loss per share attributable to the owners of the Company is based on the following data:

Loss figures are calculated as follows:

	<b>Six months ended June 30,</b>	
	<b>2023</b>	<b>2022</b>
	<b>RMB'000</b>	<b>RMB'000</b>
	<b>(unaudited)</b>	<b>(unaudited)</b>

## 20. SHARE-BASED PAYMENT TRANSACTIONS (Continued)

### Equity-settled share option scheme of the Company (Continued)

These fair values of the options granted during the six months ended June 30, 2023 were calculated using the Black-Scholes pricing model. These fair values and corresponding inputs into the model were as follows:

	March 2023	May 2023
Grant date option fair value per share	HK\$2.46	HK\$1.91
Grant date share price	HK\$3.62	HK\$2.97
Exercise price	HK\$3.62	HK\$2.97
Expected volatility	75.20%	76.00%
Expected life	6.08 years	6.08 years
Risk-free rate	3.10%	3.01%
Expected dividend yield	<u>0.00%</u>	<u>0.00%</u>

Expected volatility was determined by using the historical volatility of the comparable companies.
