1. Business Results

(1) Results of Operations

The Fast Retailing Group generated a significant increase in revenue and profits in the third quarter of fiscal 2024, or the nine months from 1 September 2023 to 31 May 2024, with consolidated revenue totaling 2.3665 trillion yen (+10.4% year-on-year) and operating profit rising to 401.8 billion yen (+21.5% year-on-year). In addition to the continued strong performances by UNIQLO operations in the North America, Europe, and Southeast Asia regions, which all reported large revenue and profit gains, UNIQLO Japan also reported significantly higher revenue and profit for the three months from March to May. All these factors helped generate an overall record performance for the Group on a consolidated basis. We recorded 75.9 billion yen under finance income net of costs, primarily comprised of 40.4 billion yen in net interest income and 35.5 billion yen in translated foreign exchange gains on foreign-currency denominated assets. As a result, profit before income taxes rose to 477.7 billion yen (+33.0% year-on-year) over the nine-month period and profit attributable to owners of the parent increased to 312.8 billion yen (+31.2% year-on-year).

The Fast Retailing Group is focusing on a number of areas as part of its endeavor to become a global No.1 brand that is essential to daily living and is trusted by all customers around the world. Those measures include (1) Further progressing the development of a digital consumer retailing industry, (2) Diversifying global earnings pillars, (3) Pursuing a business model in which the development of business contributes to sustainability, (4) Expanding the GU business segment, as well as Theory and other Global brands, and (5) Strengthening human capital. We aim to enhance our product development and branding and accelerate high-quality store openings at UNIQLO International in particular as the growth pillar of the Fast Retailing Group. We are also committed to creating LifeWear, simple and high-quality everyday clothing, in order to help build a sustainable society. Our aim is to create high-quality clothing that lasts a long time, clothing that exerts a lower impact on the planet and is made in healthy and safe working environments, and circular clothing that can ultimately be recycled or reused.

UNIQLO Japan

UNIQLO Japan reported an increase in revenue and a significant rise in profits in the first nine months of fiscal 2024, with revenue totaling 722.0 billion yen (+1.7% year-on-year) and operating profit reaching 127.8 billion yen (+28.3% year-on-year). The segment generated especially strong revenue and profit gains in the three months from March to May. Same-store sales expanded by 9.0% year-on-year in the third quarter on the back of persistently warm weather and strong sales of T-shirts, Bra Tops, and bottoms made of ultra-stretch materials that were featured in our latest advertising campaigns. The gross profit margin improved by 4.1 points year-on-year after we were able to reduce the amount of discounting required to offload excess stock and thereby improve the discounting rate. In addition, the impact of spot exchange rates used for additional production orders also eased, resulting in an improvement in cost of sales. Looking ahead, we do expect spot rates to impact results in the three months from June to August as we are currently submitting additional production orders for products that are running low on stock due to the strong sales in the previous quarter. As a result, cost of sales for the second half of fiscal 2024 from March to August 2024 is expected to hold roughly steady at the previous year's level. Finally, the selling, general and administrative expense ratio improved by 2.1 points year-on-year as the higher revenue performance resulted in a decline in personnel, store rents, and advertising and promotion cost ratios.

UNIQLO International

UNIQLO International reported a significant increase in both revenue and profit in the first nine months of fiscal 2024, with revenue rising to 1.2928 trillion yen (+17.8% year-on-year) and operating profit expanding to 221.9 billion yen (+20.6% year-on-year). UNIQLO brand recognition is rising across all markets as a result of our persistent strategy of opening new stores around the world that enable people to experience the great benefits of LifeWear, and this is now helping to generate a virtuous cycle of strengthening business performance.

Breaking down the UNIQLO International third-quarter performance from March to May into individual regions and markets and viewing performance on a local currency basis, the Mainland China market and Hong Kong market reported declines in revenue and large contractions in profit. Sales in the Mainland China market struggled in comparison with the high bar set in the previous year and in the face of a slowdown of consumer appetite, unseasonal weather, and product lineups that didn't fully satisfy the needs of local customers. By contrast, the Taiwan market reported large revenue and profit gains and South Korea reported higher revenue and profit on the back of strong sales of Summer ranges. Meanwhile, Southeast Asia, India & Australia reported higher revenue and a significant increase in profits as our efforts to enhance communication of attractive Summer products around the time of the 40th UNIQLO Thank You Festival and other promotional sales boosted sales of Bra Tops, UV-cut, T-shirts, and other core ranges. UNIQLO North America reported large increases in revenue and profit due to strong sales of Bra Tops, linen, sports utility wear, and other ranges resulting from our decision to strengthen marketing and communications to strategically enhance sales of certain products. UNIQLO Europe reported large gains in revenue and profit. Raising UNIQLO brand visibility across the

region helped generate higher-than-anticipated sales at our newly opened stores in Edinburgh in the UK and Rome, Italy, and the region also reported impressive double-digit year-on-year growth in same-store sales over the three-month period.

GU

The GU business segment reported an increase in revenue and a large rise in profits in the first nine months of fiscal 2024 on the back of strong sales of products that successfully captured mass fashion trends. Revenue totaled 246.4 billion yen (+8.1% year-on-year) and operating profit expanded to 29.4 billion yen (+14.2% year-on-year).

In the three months from March to May, GU witnessed strong sales of Sweat Look T-shirt, Cocoon Jogger Pull-on Pants, Light Denim Wide Pants, and other items that incorporated global mass fashion trends, suggesting that the brand will soon be well positioned to expand more earnestly into international markets.

Global Brands

In the first nine months of fiscal 2024, the Global Brands segment reported a decline in revenue to 103.7 billion (-2.5% year-on-year) and an operating loss of 0.3 billion yen (compared with an operating profit of 1.4 billion yen in the previous year). In the three months from March to May, sales for Theory in the United States in particular proved sluggish, resulting in a slight year-on-year decline in revenue for the Theory operation as a whole. Theory operating profit declined significantly as the operation failed to sufficiently control personnel costs and other business costs. While revenue from our PLST label declined year-on-year, after restructuring measures resulted in a contraction in total store numbers, operating profit increased on the back of improved cost structures. However, PLST is showing signs of a steady recovery, with third-quarter same-store sales rising on the back of strong sales primarily at urban stores operating under the new business model. Finally, while Comptoir des Cotonniers reported a decline in revenue on the back of fewer store numbers, the brand also reported a contraction in operational losses as restructuring measures helped improve cost structures.

Sustainability

Fast Retailing is advancing its LifeWear concept—the ultimate in everyday clothing, designed to make everyone's life better—to create apparel that emphasizes quality, design and price, in addition to being environmentally friendly, protecting human rights and contributing to society. We have identified six priority areas (materialities) for our sustainability activities. The main company activities during the third-quarter consolidated accounting period are as follows.

- Creating new value through products and sales: UNIQLO is promoting its "RE.UNIQLO" initiative to transition to a more circular society by extending the lifespan of clothes, as part of its REDUCE, REUSE, RECYCLE activities. For REDUCE activities, as at the end of May 2024, RE.UNIQLO Studio, which offers clothing repair, remake and upcycle services, has been rolled out to 44 UNIQLO stores across 19 countries and regions, and there are plans to expand it to more than 50 stores globally by the end of December 2024. For REUSE activities, the second round of trials of the UNIQLO Pre-Owned Clothes Project is being conducted at the UNIQLO Setagaya Chitosedai and UNIQLO Tenjin stores, selling pre-owned UNIQLO clothing through the end of August 2024. For RECYCLE activities, UNIQLO will be the first provider to use molecular recycling materials from some of its store-collected products (high polyester mix materials) for the Swedish national team's official apparel at the major global sporting event to be held in France in 2024.
- Respecting human rights and labor environment in the supply chain: We are continually strengthening our efforts to improve transparency and traceability, and respect human rights and labor environments. In 2019, we supported the industry commitment to Responsible Recruitment for migrant workers and clarified our policy against forced labor. In 2022, we launched workplace monitoring focused on foreign migrant workers' recruitment and employment, and classified costs to migrant workers, such as recruitment fees, travel expenses, and passport renewals as zero-tolerance items in our workplace monitoring. If such zero-tolerance issues are found, we require partner factories to remedy the matters immediately. In addition, we have conducted training and other activities with external partners such as the International Organization for Migration (IOM). As a result, we confirmed that by the end of May 2024, more than 9,800 foreign migrant workers received repayment of recruitment fees and related costs, which amount to over USD 4.5 million (approximately 700 million yen).
- Consideration for the environment: We have set ourselves the goal of reducing greenhouse gas emissions at our stores and offices by 90% by the fiscal year ending August 2030 compared to the fiscal year ended August 2019, and by 20% in our supply chains. In addition to implementing renewable energy within the company, we are strengthening our efforts to reduce greenhouse gas emissions together with UNIQLO and GU's main factories. As a result, our own greenhouse gas emissions in the fiscal year ended August 2023 were reduced by 69.4% compared to the fiscal year ended August 2019 (45.7% reduction in the previous

fiscal year), and by 10.0% in supply chains (6.2% reduction in the previous fiscal year). Also, the percentage of renewable energy implementation in the company reached 67.6% (42.4% in the previous fiscal year). In recognition of these efforts and disclosures, for the second consecutive year we have been recognized as an "A-List" company for climate change by international non-profit organization CDP.

- Community co-existence and mutual support: UNIQLO is promoting the PEACE FOR ALL project, which involves selling graphic T-shirts designed by celebrities who share our desire to take action for world peace. All profits (equivalent to 20% of the sale price per shirt) are donated to three humanitarian aid organizations to support those affected by poverty, discrimination, violence, conflict, and war. Since the start of the initiative in June 2022, our donations exceeded 1.2 billion yen at the end of April 2024.
- Supporting employee fulfillment: We are implementing various initiatives to promote diversity in four priority areas of gender, Global One Team, disabilities and LGBTQ+, including the introduction of systems and training programs to support relevant parties. In the first half of 2024, the Human Rights Committee discussed reports on improving the ratio of women in managerial positions and reducing the gender pay gap, along with measures to address these issues. Based on the committee's meetings, development plans and skill enhancement support for female management candidates, and other measures to promote the appointment of female managers, were discussed at women's human resources development meetings. In May and June 2024, human rights training was conducted for Group executive officers and business managers to deepen their understanding of human rights risks in management through example cases that could easily be perceived as harassment or discrimination.
- Implementing good corporate governance: To enable rapid and transparent management, we have a number of committees engaged in open and active discussions. The Risk Management Committee discusses measures to minimize the impact on the company in the event of a business partner's unexpected business suspension and other occurrences, in addition to strengthening internal information security and internal controls. The Human Rights Committee reports on the current status and issues raised via the hotline for company employees and the company's hotline for factory employees, and discusses ways to resolve these issues. It also discusses issues related to the results of human rights due diligence conducted at the company's bases in Japan and overseas, providing feedback to relevant departments. Regarding policies for monitoring the working environments at factories, the committee has discussed points that should be strengthened in response to human rights issues .

(6) Notes to the Interim Condensed Consolidated Financial Statements

1. Changes in accounting policies

Significant Accounting Policies applied in the Interim Condensed Consolidated Financial Statement are the same as those applied in the consolidated financial statements for the previous consolidated fiscal year, with the exception of the below newly applied standard.

From the beginning of the current consolidated fiscal year, the Group has adopted the below standard.

Standard	Standard Name	Summary of New/Revised Content and Transitional Measures
IAS 12 (Revised)	Income Taxes	Deferred tax related to assets and liabilities arising from a single transaction.
IAS 12 (Revised)	Income Taxes	Disclosure of income taxes arising from tax laws enacted or substantially enacted to introduce the "International Tax Reform - Pillar Two Model Rules."

The application of IAS 12 (Revised) has no significant impact on the Group's Interim Condensed Consolidated Financial Statement.

2. Segment Information

(i) Description of reportable segments

The Group's reportable segments are components for which discrete financial information is available and reviewed regularly by the Board of Directors (the "Board") to make decisions about the allocation of resources and to assess performance.

The Group's main retail clothing business is divided into four reportable operating segments: UNIQLO Japan, UNIQLO International, GU and Global Brands, each of which is used to frame and form the Group's strategy.

The main businesses covered by each reportable segment are as follows:

UNIQLO Japan: UNIQLO clothing business within Japan

UNIQLO International: UNIQLO clothing business outside of Japan

GU: GU clothing business in Japan and overseas

Global Brands: Theory, PLST, COMPTOIR DES COTONNIERS, and PRINCESSE TAM.TAM clothing business
