Property development business (Continued)

The gross profit ("GP") margin of property development business was increased from 3% for the six months ended 30 June 2023 to 35% for the six months ended 30 June 2024. It was mainly because of 57% of the total revenue generated from the sales of commercial units, which contributed higher GP ratio of 34% to the Group. Equipment manufacturing business

The sales of equipment manufacturing business comprised clean room equipment ("CRE"), air purification integrated solutions, Heating, Ventilation and Air Conditioning ("HVAC") equipment. The equipment manufacturing business decreased during the six months ended 30 June 2024 was mainly due to an economic uncertainty and reduced production requirements in key industries in the South East Asian markets, including Malaysia, Philippines and Vietnam. Looking forward to the coming year, we expect the global economy environment was continued to be challenging. In PRC, real estate business is still under highly challenging and uncertain condition brought by the soaring inflation, the changing global geopolitical landscape and the real estate policies in the PRC. It is believed that the consumer confidence and market sentiment may be restored at some point of time, taking into account the time needed for the relevant policies to take effect. Meanwhile, the Group will conduct timely reviews the real estate policies in the PRC and realign business strategies to facilitate the cash inflow by broadening sources of income at lower costs. As for incremental investments, the Group will adopt the strategy of shifting from an asset-heavy operation to an asset-light operation, while continuing to advance an industry driven transformation upgrade of our traditional real estate business, in order to achieve healthy and orderly growth of the Group in the long term.

4. SEGMENT INFORMATION

For management purposes, the Group is organised into business units based on the products and services offered, and has two reportable operating segments as follows:

I. Property development

Property development includes the development and sales of both commercial and residential property units, construction of resettlement houses in the PRC and the leasing of investment properties to generate rental income and to derive capital gains from the investment properties in the long term.

II. Clean room equipment, heat ventilation and air-conditioning products, and air purification integrated solutions (“Equipment manufacturing”)

A clean room provides an environment where the humidity, temperature and particles in the air are precisely controlled. Clean room equipment includes fan filter units, air showers, clean booths, pass boxes, clean hand dryers and clean benches, amongst others. Heat ventilation and air-conditioning products are essentially deflection grilles and air diffusers installed to channel and regulate the airflow into the environment within the building to ensure an even distribution of air within the confined space. Air purification equipment (also referred to as air cleaners) are electrical devices that remove solid and gaseous pollutants from the air such as formaldehyde and PM2.5 which may pose adverse health risks that include breathing difficulties, asthma and allergies. Through the function of air filters or sterilising systems built into each air purification equipment, the concentration of dust, contaminants, fine particles and volatile organic compounds in the air are reduced to the benefit of individuals within the immediate vicinity. Integrated with air purification systems, other solutions such as smart home equipment with integrated security system implementation services, renovation materials and supply and installation of smart door and window systems have been included in this segment.

7. TAXATION (Continued)

Singapore and PRC income tax liabilities are calculated at the applicable rates in accordance with the relevant tax laws and regulations in Singapore and the PRC.

Pursuant to the PRC Enterprise Income Tax Law promulgated on 16 March 2007, the enterprise income tax for both domestic and foreign-invested enterprises have been unified at 25% effective from 1 January 2008.

According to the Implementation Rules of the Corporate Income Tax Law of PRC, the Company's subsidiaries in the PRC are levied a 10% withholding tax on dividends declared to their foreign investment holding companies arising from profit earned subsequent to 1 January 2008. In respect of dividends that are subject to the withholding tax, provision for withholding tax is recognised for the dividends that have been declared, and deferred tax liability is recognised for those to be declared in the foreseeable future.

Certain subsidiaries within the Group are paying corporate income tax on a deemed tax basis as agreed with the local tax authorities. The tax obligations are determined by applying the corporate income tax rate on the deemed profit generated. The deemed profit generated is calculated based on a deemed profit rate on the revenue generated by the subsidiaries.

Land appreciation tax ("LAT") is levied on properties in the PRC developed for sale by the Group at progressive rates ranging from 30% to 60% on the appreciation of land value, which under the applicable regulations is calculated based on the proceeds from the sale of properties less deductible expenditures which include lease charges of land use rights, borrowing costs and all property development expenditures.

The provision for LAT is based on management's best estimates according to the understanding of the requirements set forth in the relevant PRC tax laws and regulations. The actual LAT liabilities are subject to the determination by the tax authorities upon the completion of the property development projects. The Group has not finalised its LAT calculation and payments with the tax authorities for some of its property development projects. The final outcome could be different from the amounts that were initially recorded, and any differences will impact on the LAT expenses and the related provision in the period in which the difference realises.
