## Overview of the Company, its Key Business Results and Business Outlook

### Company Profile and Overview

HONMA is one of the most prestigious and iconic brands in the golf industry. Founded in 1959, the Company combines latest innovative technologies with traditional Japanese craftsmanship to provide golfers across the globe with premium, high-tech and high-performance golf clubs, balls, apparels and accessories.

As the only vertically integrated golf company with rich in-house design, development and manufacturing capabilities, extensive retail footprint in Asia and a diverse range of golf clubs and golf-related products, HONMA is perfectly positioned to continually grow its business in Asia and beyond, benefitting from the return of golfers in mature golf markets such as the U.S. and Japan and from increased participation in new and under-penetrated markets such as Korea and China.

The Company will celebrate its 67th anniversary in 2025. In the past couple of years, HONMA has undertaken active brand and marketing campaigns in order to re-define the HONMA brand as a dynamic, relevant and premium golf lifestyle brand among younger golfers. The Group renewed its tour presence in Asia by retaining a HONMA team consisting of eight professional golfers whom are considered rising stars by the golf industry and collaborated with coaches and key opinion leaders in the main Asian markets. The Group also made significant investments into its retail distribution network and digital capabilities in Japan and China to provide a unified and improved consumer experience and journey to its loyal consumers as well as the younger golfers.

### Key Operating Results

Since early 2023, the global golf industry has seen downward adjustments in both number of rounds played and purchase interest of golfers at different stages and across different markets. These developments echoed the management's decision to strengthen and streamline its product offering around two consumer segments, namely super-premium and premium-performance consumer segments. The super-premium segment is a consumer segment that HONMA has maintained a leading and strong market position for decades through the development and sales of clubs that combine Japanese astatic beauty with compromising features. The premium-performance consumer segment is dominated by avid golfers, which is the largest segment in terms of participation so far and has enjoyed the strongest growth momentum for years. To increase HONMA's penetration into both segments, the Group streamlined its product strategy by enriching its TOUR WORLD club portfolio offering to include a performance enhancement series and by renewing its legacy BERES club family with a modern and sophisticated design and development approach to appeal to today's golfers.

These consumer-centric product strategy and development efforts will continue to enhance HONMA's brand and product awareness and participation of younger and more avid golfers.

## Overview of the Company, its Key Business Results and Business Outlook (continued)

### Highlights of Major Achievements

For the six months ended 30 September 2024, the Company steadfastly implemented its business strategies while carefully protecting its financial strength and cash flow. Among others, the Company has continued to invest in and focused on the following strategic initiatives which the Company believes will continue to bring satisfactory business advancements and results in the future.

- ***Re-defining the HONMA brand.*** The Company initiated various programs to improve its global brand positioning and communication with target consumers. To re-define the HONMA brand as a dynamic, relevant and premium golf lifestyle brand among internet-savvy younger golfers, the Company has constantly upgraded its global website and social media platforms with regular and relevant visual and content updates to continuously promote its brand and product awareness and to appeal to younger golfers. The rapid uptick in HONMA's digital communications on both earned and paid media has contributed to continued improvements in the organic traffic, conversion and other digital engagement matrixes such as bounce rate, time on site, etc.

To create an end-to-end digital ecosystem around the re-defined brand and golfers in the super-premium and premium-performance segments, the Company implemented customer relationship management ("**CRM**") systems in multiple markets and added advanced e-commerce capabilities and consumer-centric custom tools thereon, with a view to provide consumers with the ultimate 360-degree brand experience, to strengthen HONMA's direct-to-consumer communication and to eventually increase sales both online and offline.

- ***Focusing on club products that best represent Japanese craftsmanship and world standard innovative technology in pursuit of players in super-premium and premium-performance segments.*** HONMA remains committed to applying cutting-edge technologies and artisan-style Japanese craftsmanship to the design, development and manufacturing of a comprehensive range of exquisitely crafted and performance-driven golf clubs. HONMA applied several of its revolutionary proprietary technologies to the design and development of its latest BERES and TOUR WORLD products, designed for affluent and avid golfers. Following the launch of BERES 09 in early 2024, the Group continuously penetrated into the super-premium and premium-performance consumer segments, especially in Asia. Revenue from BERES golf clubs rose by 18.4% in Japan and by 49.4% in Southeast Asia from the six month ended 30 September 2023, reconfirming HONMA's strong brand equity and its ability to withstand economic challenges since HONMA went into the golf business in 1959.

#### Highlights of Major Achievements *(continued)*

- ***Accelerating growth in golf balls business and relaunching apparel business to create a comprehensive range of golf products for golfers in the super-premium and premium-performance segments.*** Unlike its peers, HONMA continues to derive most of its revenue from the sales and distribution of golf clubs. For the six months ended 30 September 2024, golf clubs generated 68.0% of the Group's total revenue. In addition, considering the continued and stable contribution in revenue from golf balls over the past years, the Company further prioritized its product development resources and launched golf balls with its own patent in order to meet the HONMA brand positioning and play preferences of its consumers.

In January 2019, HONMA re-launched its apparel business. As of now, the apparel collection comprises of a professional and a fashion athletic line, catering to the distinctive requirements of golfers in China, both on-course and off-course. The six months ended 30 September 2024 featured mostly HONMA's 2024 Spring/Summer collections.

- ***Reprioritising HONMA's growth strategies in North America and Europe while improving both markets' financial standing.*** North America and Europe continued to enjoy the largest golfer demographics but with varied market conditions. For the six months ended 30 September 2024, the Group continued to reprioritise its distribution strategy in North America and Europe by focusing on a smaller but premier group of accounts that are most capable to represent HONMA's tradition and pursue in the super-premium and premium-performance consumer segments. At the same time, the Group continued optimising its organisational set up and cost base in both markets to properly anchor their near to mid-term growth amidst social, economic and financial uncertainties.

Following such strategic adjustment, in North America, the Group opened 10 points of sales ("POS") in the six months ended 30 September 2024, hence increasing its total POSs there to 354 by 30 September 2024. During the same period, in Europe, the Group opened 10 new POSs, leading to a modest POS network of 139 locations.

Despite the shift, the Company continued to make investments into its digital communication and e-commerce activities in both markets to create an important brand touchpoint for consumers researching and searching for HONMA products, local retailers or fitting experience. Various digital marketing efforts have been implemented to drive website traffic and target potential shoppers through re-targeting efforts in social media and search engine marketing. For the six months ended 30 September 2024, the Company had seen continued increase in site visits. The strong performance evidences HONMA's brand equity and consumer interest in the North American market.

### Outlook

#### Business Outlook

The current financial year continues to present operating challenges and business uncertainties for HONMA due to economic uncertainty and geopolitical tensions that loomed over most markets.

#### Revenue by Geography (continued)

Revenue from Japan marginally decreased by 0.4% from JPY4,172.8 million for the six months ended 30 September 2023 to JPY4,156.8 million for the six months ended 30 September 2024. The decrease was primarily attributable to the decline of 7.6% in Japan's wholesales revenue as the Group focused on high-profit self-operated channels and gradually reduced the loss-making and low-efficiency wholesale channels. During the same period, the retail business in Japan increased by 5.4%, on the back of continued retail operation improvements, marketing activities to drive HONMA brand and product awareness, and successful activation of various HONMA products.

Revenue from Korea recorded a decline of 82.6% from JPY3,942.8 million for the six months ended 30 September 2023 to JPY686.8 million for the six months ended 30 September 2024, as the Group revisited its distribution network amidst market reshuffle. On a constant currency basis, revenue from Korea decreased by 83.1% during the same period.

Revenue from China (including Hong Kong and Macau) experienced a decline of 11.5% from JPY3,529.1 million for the six months ended 30 September 2023 to JPY3,123.0 million for the six months ended 30 September 2024 as overall economy and retail market sentiment in China continued to experience downward pressure. On a constant currency basis, revenue from China (including Hong Kong and Macau) decreased by 17.8% during the same period.

Revenue from North America increased by 23.5% from JPY335.0 million for the six months ended 30 September 2023 to JPY413.8 million for the six months ended 30 September 2024, mainly due to improved distribution network and launch of BERES09 and Ladygo. On a constant currency basis, revenue from North America increased by 14.6% during the same period.

Revenue from Europe increased by 92.4% from JPY135.9 million for the six months ended 30 September 2023 to JPY261.4 million for the six months ended 30 September 2024. On a constant currency basis, revenue from Europe increased by 78.3% during the same period. Such increase reconfirmed the Group's decision to change its distribution model in Europe to an indirect one.

Revenue from other regions increased by 8.7% from JPY1,079.2 million for the six months ended 30 September 2023 to JPY1,172.7 million for the six months ended 30 September 2024, mainly due to improved pricing policy and successful activation of BERES products. On a constant currency basis, revenue from other regions increased by 2.0% during the same period.

Revenue from the Group's home markets, namely Japan, Korea and China (including Hong Kong and Macau) accounted for 81.2% of the Group's total revenue for the six months ended 30 September 2024.

The Group has an extensive sales and distribution network that allows the Group to address a broad customer base in its target markets. The Group's sales and distribution network consists of HONMA-branded self-operated stores as well as POSs owned and managed by third-party retailers and wholesalers. Revenue from self-operated stores increased by 6.5% from JPY5,170.6 million for the six months ended 30 September 2023 to JPY5,507.6 million for the six months ended 30 September 2024. On a constant currency basis, revenue from self-operated stores increased by 2.6% during the same period. Such increase was mainly due to a robust retail sales performance in Japan and mainland China where sales grew by 5.4% and 13.0%, respectively, during the same period.

Revenue from sales to third-party retailers and wholesalers decreased by 46.3% from JPY8,024.3 million for the six months ended 30 September 2023 to JPY4,306.9 million for the six months ended 30 September 2024. On a constant currency basis, revenue from third-party retailers and wholesalers decreased by 48.3% during the same period. Such decrease was primarily due to wholesales revenue decrease in Japan, Korea and China (including Hong Kong and Macau) as a result of economy slowdown and channel reshuffle.

## Financial Review *(continued)*

### Non-IFRS Financial Measures

In addition to the IFRS measures in its consolidated financial statements, the Group also uses the non-IFRS financial measures of operating (loss)/profit and net operating profit to evaluate its operating performance. The Group believes that such non-IFRS measures provide useful information to investors in understanding and evaluating its consolidated results of operations in the same manner as its management and in comparing financial results across accounting periods on a like-for-like basis.

The use of operating (loss)/profit and net operating profit has material limitations as analytical tools, as operating (loss)/profit does not include all items that have impacted profit before tax, the nearest IFRS performance measure, and net operating profit does not include all items that have impacted net (loss)/profit, the nearest IFRS performance measure.

### Operating (Loss)/Profit

The Group derives operating (loss)/profit from (loss)/profit before tax by (i) subtracting other income and gains and (ii) adding other expenses. Operating (loss)/profit eliminates the effect of other income and gains and other expenses, which are primarily related to non-recurring events. The following table reconciles operating (loss)/profit to (loss)/profit before tax for the periods indicated:

#### Net Operating Profit

The Group derives net operating profit from net (loss)/profit by (i) subtracting other income and gains, (ii) adding other expenses, and (iii) adding impact on tax related to items (i) and (ii) above. Net operating profit eliminates the effect of other income and gains and other expenses, which are primarily related to non-recurring events. ### Working Capital Management (continued)

Inventories turnover days increased by 14 days from 321 days for the twelve months ended 31 March 2024 to 335 days for the twelve months ended 30 September 2024, primarily due to lower sales in the past 12 months. Overall inventory level decreased by 10.3%.

Trade and bills receivables turnovers days slightly decreased by seven days from 53 days for the twelve months ended 31 March 2024 to 46 days for the twelve months ended 30 September 2024, primarily due to receivables reducing by 53% as compared to the six months ended 30 September 2023.

Trade and bills payables turnover days decreased by 10 days from 34 days for the twelve months ended 31 March 2024 to 24 days for the twelve months ended 30 September 2024, primarily due to lower purchase during the third quarter of 2024, which resulted in lower payables.

### Inventories (continued)

The following table sets forth aging analysis of the Group's inventories as at the dates indicated:

	As at 30 September 2024	As at 31 March 2024
	<i>(In JPY thousands)</i>	
Within 1 year	4,384,099	4,126,435
1 year to 2 years	1,877,452	1,795,347
2 to 3 years	2,008,488	2,699,420
3 to 4 years	864,575	1,557,904
<b>Total</b>	<b>9,134,614</b>	<b>10,179,106</b>

The Group prepares its inventory aging analysis with reference to product launch date, instead of capitalisation date. For example, inventories reported as aged between two to three years in the table above represent inventories relating to products that were launched two to three years before the relevant balance sheet date. Such inventories may have been produced and/or procured and hence capitalised more recently than as shown in the said aging analysis.

The Group adopted this approach of inventory aging analysis because it allows the Group to implement a more effective inventory management process relative to each product's life cycle. The Group typically launches new club, ball and accessory products every 24 months and carries its previous older generation for another 12 months.

## Financial Review (continued)

### Use of Proceeds from the Global Offering (continued)

Notes:

- (1) The figures in the table are approximate figures.
- (2) The expected timeframe for utilizing the remaining proceeds is based on the best estimation of the future market conditions made by the Group. It will be subject to change based on the current and future development of market conditions.
- (3) As at the date of this interim report, the Group had not identified, committed to or entered into negotiations with any acquisition targets for its use of net proceeds from the global offering; hence it has no specific expected timeframe for fully utilizing such proceeds. The Group will continue to prudently evaluate potential acquisition targets within the golf products industry based on, among other factors, their brand recognition, geographic footprint, distribution network, product offerings and financial condition, with a goal of identifying potential acquisition targets that best fit its growth strategies.
- (4) As at the date of this interim report, the Group has repaid the interest-bearing bank borrowings intended to be repaid through the proceeds from the global offering in full. The difference between the intended use of proceeds from the global offering and the actual repayment was due to the changes in foreign exchange rates. For the remaining unused net proceeds, the Group plans to use for general corporate purpose. As at the date of this interim report, the Group has not used the remaining 0.2% of the unused balance and will evaluate suitable usage based on its business needs.

As at 30 September 2024, the unused balance of the proceeds from the global offering of approximately JPY4,972.2 million are currently deposited with creditworthy banks with no recent history of default.

### Events after the Reporting Period

## SCOPE OF REVIEW

We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410 *Review of Interim Financial Information Performed by the Independent Auditor of the Entity* issued by the Hong Kong Institute of Certified Public Accountants. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

# Report on Review of Interim Condensed Consolidated Financial Statements

## CONCLUSION

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim condensed consolidated financial information is not prepared, in all material respects, in accordance with IAS 34.

### 2.1 BASIS OF PREPARATION

The interim condensed financial information for the six months ended 30 September 2024 has been prepared in accordance with IAS 34 *Interim Financial Reporting*. The interim condensed consolidated financial information does not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the Group's annual financial statements for the year ended 31 March 2024.

### 2.2 CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES

The accounting policies adopted in the preparation of the interim condensed consolidated financial information are consistent with those applied in the preparation of the Group's annual consolidated financial statements for the year ended 31 March 2024, except for the adoption of the following revised International Financial Reporting Standards ("IFRSs") for the first time for the current period's financial information.

Amendments to IFRS 16

*Lease Liability in a Sale and Leaseback*

Amendments to IAS 1

*Classification of Liabilities as Current or Non-current*

# Notes to Interim Condensed Consolidated Financial Information

For the six months ended 30 September 2024

## 2.2 CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES (continued)

The nature and impact of the revised IFRSs that are applicable to the Group are described below:

- (a) Amendments to IFRS 16 specify the requirements that a seller-lessee uses in measuring the lease liability arising in a sale and leaseback transaction to ensure the seller-lessee does not recognise any amount of the gain or loss that relates to the right of use it retains. Since the Group has no sale and leaseback transactions with variable lease payments that do not depend on an index or a rate occurring from the date of initial application of IFRS 16, the amendments did not have any impact on the financial position or performance of the Group.
- (b) The 2020 Amendments clarify the requirements for classifying liabilities as current or non-current, including what is meant by a right to defer settlement and that a right to defer must exist at the end of the reporting period. Classification of a liability is unaffected by the likelihood that the entity will exercise its right to defer settlement. The amendments also clarify that a liability can be settled in its own equity instruments, and that only if a conversion option in a convertible liability is itself accounted for as an equity instrument would the terms of a liability not impact its classification. The 2022 Amendments further clarify that, among covenants of a liability arising from a loan arrangement, only those with which an entity must comply on or before the reporting date affect the classification of that liability as current or non-current. Additional disclosures are required for non-current liabilities that are subject to the entity complying with future covenants within 12 months after the reporting period.

The Group has reassessed the terms and conditions of its liabilities as at 1 April 2023 and 2024 and concluded that the classification of its liabilities as current or non-current remained unchanged upon initial application of the amendments. Accordingly, the amendments did not have any impact on the financial position or performance of the Group.

- (c) Amendments to IAS 7 and IFRS 7 clarify the characteristics of supplier finance arrangements and require additional disclosure of such arrangements. The disclosure requirements in the amendments are intended to assist users of financial statements in understanding the effects of supplier finance arrangements on an entity's liabilities, cash flows and exposure to liquidity risk. The disclosure of relevant information for supplier finance arrangements is not required for any interim reporting period during the first annual reporting period in which an entity applies the amendments. As the Group does not have supplier finance arrangements, the amendments did not have any impact on the interim condensed consolidated financial information.

The plans have the legal form of a foundation and they are administrated by independent trustees with the assets held separately from those of the Group. The trustees are responsible for the determination of the investment strategy of the plan.

The trustees review the level of funding in the plan by the end of each reporting period. Such a review includes the asset-liability matching strategy and investment risk management policy. This includes employing the use of annuities and longevity swaps to manage the risks. The trustees decide the contributions based on the results of the annual review.

The plans are exposed to interest rate risk, the risk of changes in the life expectancy for pensioners and equity market risk.

Honma Japan partly shifted its retirement benefit plans from defined benefit corporate pension plans to defined contribution pension plans in January 2017.

The most recent actuarial valuations of the plan assets and the present value of the defined benefit obligations have been carried out by Mizuho Trust & Banking Co., Ltd. and Professional Actuary Management Consulting Co., Ltd. which are members of the actuarial societies of Japan and Taiwan, respectively, using the projected unit credit actuarial valuation method.

## 22. FAIR VALUE AND FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENTS

The carrying amounts and fair values of the Group's financial instruments, other than those with carrying amounts that reasonably approximate to fair values, are as follows:

	Carrying amounts		Fair values	
	30 September 2024 (Unaudited) (JPY'000)	31 March 2024 (Audited) (JPY'000)	30 September 2024 (Unaudited) (JPY'000)	31 March 2024 (Audited) (JPY'000)
Interest-bearing bank borrowings	<b>536,460</b>	578,820	<b>494,858</b>	539,318

Financial assets and liabilities not presented at their fair value on the interim condensed consolidated statements of financial position mainly represent cash and cash equivalents, pledged deposits, trade receivables, financial assets included in prepayments, deposits and other receivables, trade and bills payables, current portion of interest-bearing bank borrowings and financial liabilities included in other payables and accruals, their fair values are approximate to their carrying amounts largely due to the short term maturities of these instruments.

The fair values of rental deposits paid as lessee included in other non-current assets and rental deposits received as lessor included in other non-current liabilities have been calculated by discounting the expected future cash flows using rates currently available for instruments with similar terms, credit risk and remaining maturities. The fair values have been assessed to be approximate to their carrying amounts.

### 22. FAIR VALUE AND FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENTS (continued)

The Group has estimated the fair value of bills receivables by using a discounted cash flow valuation model based on the market interest rates of instruments with similar terms and risks.

The fair values of unlisted equity investments have been estimated using a market-based valuation technique based on assumptions that are not supported by observable market prices or rates. The directors believe that the estimated fair values which are recorded in the interim condensed consolidated statements of financial position, and the related changes in fair values, which are recorded in other comprehensive income, are reasonable, and that they were the most appropriate values at the end of each of the reporting periods.

The Group's corporate finance team headed by the finance manager is responsible for determining the policies and procedures for the fair value measurement of financial instruments. The corporate finance team reports directly to the chief financial officer and the board of directors. At each reporting date, the corporate finance team analyzes the movements in the values of financial instruments and determines the major inputs applied in the valuation. The valuation is reviewed and approved by the vice president responsible for finance. The valuation process and results are discussed with the audit committee twice a year for interim and annual financial reporting.

The fair value of the non-current portion of interest-bearing bank borrowings has been calculated by discounting the expected future cash flows using rates currently available for instruments with similar terms, credit risk and remaining maturities. The differences between the carrying amounts and fair values of those financial liabilities are not significant.
